Important Information:

Bonus Philosophy

Life insurance involves the transfer of risk from an individual to a life insurer, and the pooling of risks across large groups of policies. With participating insurance, a portion of these risks is borne by the policyholders or shared between the policyholders and the insurer. In return, policyholders may receive policyholder bonuses in the form of reversionary/terminal/special bonuses. These bonuses are not guaranteed and can vary from year to year.

In general, bonuses on these policies reflect the experience, over time, of the group to which they belong. Bonuses will typically vary based on the performance of a number of factors, with the investment return*, including the impact of asset defaults and investment expenses, normally being the main determinant of bonus performance. Other factors^ include, but are not limited to, claims experience, taxes, expenses and policyholder persistency experience.

Favourable and unfavourable experience may be smoothed out over time to provide more stable bonuses to policyholders. For products with a terminal/special bonus feature, adjustment to terminal/special bonus scales pass through experience normally with less smoothing applied.

The bonus allocation process seeks to achieve reasonable equity among groups of policies and among policies issued at different times, to the extent practicable. Upon declaration of Reversionary Bonus or pay-out of terminal/special bonus to policyholders, shareholders will also be entitled to a share of the distribution.

At least annually, the Board of Directors of Sun Life Hong Kong Limited determines the amount of bonus to be declared or paid to participating policyholders. This determination is based on the advice of Sun Life Hong Kong Limited's appointed actuary, who applies accepted actuarial principles and practices. Management of participating business is also governed by Sun Life Hong Kong Limited's internal policies, as well as advice by the internal Par Governance Committee.

* Investment return includes investment income and changes in asset value of the backing portfolio. Performance of the investment return is affected by interest earnings and other market risk factors including interest rate or credit spread movements, credit events, and price fluctuations in non-fixed income assets. Please see the Investment Philosophy for more details on the investment policies, objectives and strategy in relation to the investments of the backing portfolio.

^ Claims experience represents the experience of mortality and morbidity. Persistency experience includes policy lapse/maturity and partial surrender experience; and the corresponding impact on investments. The expense factor includes maintenance expenses only, where it is charged to the participating fund at the level Sun Life Hong Kong Limited expects to be required over the foreseeable future. Policyholders will share the impact of any changes, over time, to the expected level of expenses required for the then foreseeable future. Any deviations on a year to year basis of the expenses actually incurred from the then expected level required, will be absorbed by the shareholders.

Please refer to Sun Life Hong Kong Limited's website (www.sunlife.com.hk/dividendhistory_eng) for bonuses fulfillment ratios details.

Investment Philosophy (Policies, Objectives, and Strategy)

The investment strategy supporting this product is intended to provide long-term value to the policyholders with a suitable level of risk; and to achieve a main objective of delivering a fair chance of meeting illustrated non-guaranteed benefits in addition to the guaranteed benefits.

The assets supporting the investment strategy span a diversified range of fixed income assets such as sovereign bonds, corporate bonds, and corporate loans; as well as non-fixed income assets which are equity-like investments. The credit profile for the fixed income assets is a portfolio of diversified investment grade securities. Investments of below investment grade assets are prohibited unless as a result of credit rating downgrade during the portfolio holding period as per our risk appetite and investment policies.

The current long-term target mix for the assets supporting this product is shown below:

アセット・クラス	目標アセット・割合
固定利付債	50% – 70%
固定利付債以外	30% – 50%

The actual asset mix percentages will fluctuate based upon market conditions and investment experience. Diversifying the investments between asset classes results in a more stable investment return over the long term.

Investments are in the same currency as the underlying policies where appropriate, with considerations on availability of assets and risk/return trade-offs. Unmatched currency exposures are managed with the use of appropriate hedging instruments. Derivatives may be used to hedge against market risks but are not intended to bring the risk profile beyond established risk tolerances.

The investment strategy noted above may be subject to change, subject to a rigorous internal review and approval process. We will notify the policyholders upon any material changes.
